

Role-based interface

**Jobstream 9.2
NEW FEATURE**

Trust management is all about information, but with so much in your database it can sometimes be hard to get to the information you actually need. Jobstream 9 now offers a unique, role-based approach that addresses this problem to increase user efficiency while ensuring your data is secure.

Immediate access to relevant, actionable information

From senior executives and client accountants to compliance officers and administrators, Jobstream 9 empowers users by delivering the information that is most relevant to their individual role.

Get straight to the information you need

By providing immediate access to the most relevant data, functions and reports, Jobstream 9 offers an efficient and uniquely personalised experience.

Quickly see which tasks need attention

Task lists are filtered so users can quickly home in and take action on those jobs which are most important.

Keep data secure

Role and data-based permissions ensure Jobstream 9 keeps information secure whilst allowing safe, controlled access from external applications.

Key features

Jobstream 9 is the global software platform at the heart of trust companies, family offices, and similar offshore organisations.

Its unique role-based approach provides immediate access to relevant actionable information.

- Role-based interface**
- Actionable task lists**
