

Payments Plus

feature pack

Streamlined workflow processing for payments related to office or client bank accounts.

Payments Plus is a cost-efficient enhancement that seamlessly integrates with Jobstream 9 to provide a flexible workflow process for managing payments related to office or client bank accounts.

Payments Plus for Jobstream 9 enables:

- Flexible payment creation
- Automated payment method selection
- Accelerated bookkeeping
- Custom payment processing
- Efficient payment transfer
- Optional integration with the Banking Plus feature pack.

Payments Plus reduces the time it takes to manage payments, and can be integrated with Banking Plus for full straight-through processing of bank transactions, enabling your organisation to manage both office and client funds quickly and confidently.

- Flexible payment creation
- Automated payment method selection
- Accelerated bookkeeping
- Custom payment processing
- Efficient payment transfer
- Integration with Banking Plus.

The unique benefits of Payments Plus

Flexible creation

Save time through automated payment creation, and shortcuts for manual payment creation. Payments Plus provides specially designed forms that guide the user through the process of creating a payment request via a dedicated payments browser. Alternatively, payments can be automatically created from the creditor's ledger, by simply selecting invoices that need to be paid.

Automated method selection

Quickly implement a variety of electronic payment methods or paper-based instructions. Payments Plus allows users to easily configure the default payment method for a given account and payee. Once configured, payment method selection can be fully automated.

Accelerated bookkeeping

Gain complete confidence through automated bookkeeping and powerful custom bookkeeping templates. Where payments have been created by invoice selection bookkeeping is automated, with invoices allocated to respective payments once they have been processed and posted. Where payments have been created manually within the payments browser, users can select a predefined template to manage the bookkeeping process, or quickly add the corresponding journal entry for ad hoc transactions.

Custom processing

Ensure complete control of the payment process. Payments Plus allows custom rules to be defined, managing the process that

payments are subjected to as they proceed from their initial draft status, eventually being sent to the bank for verification.

Rules can be configured according to the payment type, while varying permission levels and authorisation rights can be defined for multiple users.

Efficient transfer

Efficiently send payments electronically through automated creation of bank payment instructions. Payments Plus can automatically create and upload payment instructions to the bank, supporting a variety of formats including RBSI eQ.

Integration with Banking Plus

Enable straight-through processing with Banking Plus for Jobstream 9, featuring automated import of electronic bank statements for intelligent reconciliation and posting of the payments processed in Payments Plus. Banking Plus is the perfect companion to Payments Plus.

A valued partner

Jobstream Group has been serving the specialist accounting, administration and practice management requirements of the offshore financial services industry since 1993. Our flagship product Jobstream 9 is backed by unrivalled customer service, training and support, allowing our clients to spend their time using their data not creating it.

We continually invest in our software, progressing it in partnership and consultation with our clients. We are dedicated to helping them get the most from their Jobstream solution, offering the best consultants in the business coupled with a robust upgrade process, and a portfolio of powerful feature packs to ensure that as their business evolves, so too does their Jobstream platform.

Today we are a valued partner to over 60 clients globally, with a proven track record delivering the highest standards of service. We are proud to be a Microsoft Certified Partner with Independent Software Vendor status.
